Aptitudes principales

DevSecOps
Full-Stack Development
Front-End Design

Languages

Francés (Limited Working)
Español (Native or Bilingual)
Inglés (Native or Bilingual)
Italiano (Professional Working)

Certifications

Curso de Big Data
Curso Diseño de Patrones en TypeScript y JavaScript
Algoritmos y Estructuras de Datos
React with AWS Amplify

Diego Fernández Montesinos

Software Engineer | Fullstack Developer | React + TypeScript Expert | Python Backend | Frontend Architecture | Frontend Mentor
Madrid, Comunidad de Madrid, España

Extracto

I am a Fullstack Developer with 4+ years specializing in Frontend (React + TypeScript) and more than 1 year of Backend experience (Python, .NET), passionate about building secure, scalable, and user-centric applications.

Currently, I am leading the frontend architecture of a large-scale web application while mentoring a team of 4 developers. I have contributed to projects across international teams in Sweden, France, Spain, Venezuela, and Japan, including high-security environments such as Airbus/OTAN projects or the Scania's ATS projects.

My technical stack includes:
- Frontend: React, TypeScript, Vite, Tailwind, Sass, CSS, React Testing Library, TDD
- Backend: Python (Flask/Django), .NET (c#), REST API design, SQL (Oracle, MySQL)
- DevOps/Cloud: AWS (basic), Docker, CI/CD pipelines
- Practices: Pragmatic programming (DRY, KISS, Early Return), Security by Design, performance optimization, accessibility
- Tools: Git, Figma, GitLab, GitHub, Agile (Scrum, working with Product Owners and Scrum Masters)

I thrive in international, cross-functional environments where I can combine technical expertise with collaboration and mentorship. My next professional goal is to grow into a Senior Fullstack/Tech Lead role, contributing to architecture decisions, strengthening software security, and driving best practices in testing, CI/CD, and cloud environments.

Languages: English (C1), Spanish (native), French (B1), Italian (B1).

Experiencia

KYOCERA Document Solutions España

Software Engineer | Frontend Architect and Mentor

marzo de 2025 - Present (1 año 8 meses)

Madrid, Comunidad de Madrid, España

Sociedad de Tasación:

Key contributor to the end-to-end development of a high-performance Real Estate Valuation application.

Spearheaded the frontend architecture applying Feature-Oriented Modular Frontend Architecture with Design System Support (FOM-DSS), Atomic Design, and layout architecture to ensure scalability, seamless performance, and maintainability.

Established a robust Test-Driven Development (TDD) workflow using Vitest and React Testing Library (RTL). Led UX/UI design processes with Figma, executed performance code audits using Lighthouse, and documented system architectures using the C4 model. Acted as a React Mentor while collaborating with a .NET C# microservices backend team.

Skills: Frontend Architecture (FOM-DSS) · React & TypeScript · TDD (Vitest & RTL) · UI/UX Design (Figma) · Lighthouse Performance Audit · C4 Model Documentation · +4 skills

ALTEN Delivery Centre Spain

Senior Front-End Software Developer | Team Manager

agosto de 2023 - marzo de 2025 (1 año 8 meses)

Madrid, Comunidad de Madrid, España

Scania Sweden (TRATON Group):

Key engineer driving software development for international autonomous vehicle initiatives, bridging frontend engineering, system orchestration, and team expansion.

Led the end-to-end development of BringUp, a critical application designed for OS installation and high-precision calibration of LiDARs and radars in autonomous vehicles. Designed and implemented Hawk, a real-time monitoring system to track and manage camera, LiDAR, and radar telemetry across multiple truck onboard computers simultaneously.

Scaled the engineering team from 1 to 12 members within less than a year. Stepped in as Scrum Master for several months to ensure Agile delivery, streamlined workflows, and cross-functional alignment. Architected solution frontends using React, TypeScript, JavaScript, CSS3, and SASS, with Python

powering backend operations, GitLab for CI/CD pipelines, and Confluence for system documentation.

Skills: Team Leadership & Scaling · Agile/Scrum Master · React & TypeScript · Autonomous Vehicle Systems · Python Backend · CI/CD Pipelines (GitLab) ·

KEAPPS
Full Stack Software Developer
febrero de 2023 - agosto de 2023 (7 meses)
Getafe, Comunidad de Madrid, España

Airbus Defence and Space:
Contributed to critical software engineering initiatives for international aerospace defense programs within Airbus Defence and Space.
Engineered key components for the Honey EuroDrone program, developing a secure application to manage, upload, and update complex technical documentation for military aircraft systems.
Maintained and enhanced frontend interfaces using AngularJS, HTML5, CSS3, and JavaScript, while building resilient backend services powered by Java 8. Integrated Oracle SQL Developer for database management and utilized SourceTree (Git) for version control and collaborative workflows.

Skills: Defense Software Development · Java 8 & AngularJS · Database Management (Oracle SQL) · Version Control (Git/SourceTree) · Aerospace Systems

technological sharks
Full Stack Software Developer
enero de 2021 - febrero de 2023 (2 años 2 meses)
Venezuela

Client Projects & Freelance:
Delivered custom web applications for diverse clients while contributing to the core development of a full-scale digital wallet and payment platform (similar to PayPal).
Engineered responsive, accessible, and high-performance web interfaces tailored to client-specific requirements. Spearheaded key frontend features for a secure fintech application, implementing seamless payment workflows, transaction history interfaces, and account management modules to ensure intuitive user experiences and strict data reliability.
Collaborated closely with cross-functional teams and individual stakeholders to translate business logic into scalable code, optimize application performance,

and maintain modern web development standards throughout the project lifecycle.

Skills: HTML, ReactJs, Typescript, Python

CENTURY 21®
Business Development Manager | administrativo
marzo de 2017 - febrero de 2023 (6 años)
España

Business Manager, leading team of 25 people, helping them to reach their yearly goals. Increased of the productiong of all members at least a 25% of their initial sales skills and capacity

Torre oleus
Civil Engineer
marzo de 2011 - noviembre de 2016 (5 años 9 meses)
Venezuela

Ingeniero civil de obras, trabajo de campo en la construcción de 8 centros empresariales en la ciudad de Puerto La Cruz, Venezuela. Mejorando el rendimiento de los empleados hasta en un 50%, bajo las estrictas condiciones laborales venezolanas, aplicando siempre la lógica y las también estrictas leyes sismoresistentes venezolanas.

Educación

Universidad 'Santa María'
Ingeniero Civil, Ingeniería civil · (2009 - 2016)

Codehouse Academy
